Problem

- Complexity and inconvenience of manually tracking, calculating and reconciling shared cost
- Confusion, disputes in settling debts
- Manual methods may lead to errors and delays in reimbursement
- even disagreement may affect relationships

Solution

- Required a centralized platform capable of accurately tracking all expenses
- Seamlessly dividing cost among participants
- providing a transparent, real-time view of each member's financial contributions and obligations

Features

- We can do this for different currencies also
- Each person gets individual bill of the amount to be paid

Tech stack

- Python 3
- HTML
- CSS
- React JS
- Flask

The Demo

Future Scope

- Multi currency support
- Security and Privacy focus
- Collaborative features beyond expense

November 27, 2023

Challenges

- User Interface design
- Complexity in expense tracking

THANK YOU!!!
